

ULTRALITE

TOP SELLING FEATURES

- 1. A TRUE ultra light weight line up with models ranging from 4,300 lbs. to 6,700 lbs.**
 - a. 9 floor plans under 6000 lbs.
 - b. All floor plans easily 1/2 ton towable
- 2. AZDEL Composite - BOTH interior and exterior wall panels**
 - a. Virtually eliminates any chance for delamination
 - b. 50% lighter than wood backed fiberglass
 - c. **NO WOOD** = Will not rot, mold, or sustain water damage
 - d. Increased R-2 insulation factor (brings sidewalls to a total of R-11)
 - e. Eco friendly green product
- 3. Cross-Flex by Dicor Roof Membrane w/Dual Crowned Laminated Roof**
 - a. Strongest & lightest membrane in the industry- 10X tear & 30X puncture resistant
 - b. Vacuum bonded and aluminum trussed - less chance of rot
 - c. Stronger than conventional built roofs - Walkable
 - d. Superior insulation factor keeping unit cooler and warmer (R-14 on 8' wides)
 - e. Easier towability - not as top heavy (lower center of gravity)
- 4. Aluminum Framed Walls w/Double Lamination**
 - a. Both vacuum bonding and pinch rolling is superior - only mfg doing this
 - b. Stronger construction being all one piece - solid wall
 - c. All openings (i.e.) doors, windows etc. framed in aluminum
 - d. Heavier density bead board foam insulation than competition
 - e. Wood cleat inside of aluminum tube around the perimeter for superior hold
- 5. Laminated Floor**
 - a. Welded aluminum frame - lightweight durability
 - b. Full cross-member support
 - c. Double layer luan top decking - stronger & no squeaking
 - d. High density block foam insulation
 - e. Darco waterproof floor wrap
 - f. No sagging and bouncing when walking around - aids in heating & cooling
 - g. No channels cut in floor to weaken the overall floor structure - heating ducts in walls
- 6. Rear Wall Laminated & Vacuum Bonded**
 - a. **AZDEL** composite
 - b. Backed and ready for a ladder
 - c. Increases durability of unit
- 7. Enclosed Underbelly w/Forced Air Heat**
 - a. Dedicated heat duct to underbelly
 - b. Not only enclosed but provides Insulation
 - c. Longer camping season
 - d. Protective layer from rodents and debris
- 8. Lighter Weight BUT Built to Last w/Greater Carrying Capacity**
 - a. 6" I-beam frame or larger on all models
 - b. Heavier axles and nitrogen filled radial tires
 - c. Laminated, Azdel & the **APEX Process** = lighter unit & easier to tow
 - d. Larger carrying capacity than the competition = Load Up Your Unit
 - e. Better fuel efficiency, less wear & tear
- 9. Off-Grid Ready**
 - a. 200 watt solar panel w/30 amp controller
 - b. Dual 20 lb. LP tanks - easier to swap out than 30 lb.
 - c. Camp where and when you want
- 10. Green Manufacturing - EMERALD CERTIFIED**
 - a. Only **THREE** mfg. in this category - **APEX**, Lance & Airstream
 - b. Low VOCs (volatile organic compounds) - particulars in air
 - c. Less wood, recycling program & processes
 - d. Indoor air quality
